08	Integration with Existing Platform
09	Data, Security & Compliance
10	Recommended Implementation Phases
11	Success Metrics & Business Outcomes

Status: This module is planned for implementation and integrates with the existing TEHA platform architecture. It is documented separately from the main Partnership Proposal.

01 – OVERVIEW

Executive Overview

The Agent & Ambassador Referral Management System is a strategic client acquisition channel for TEHA — not merely an additional website feature.

It enables accredited travel agents and motivated ambassadors to register on the platform, promote TEHA through unique referral links, bring potential clients into TEHA's existing application and enquiry workflows, and track performance through dedicated dashboards.

Administrators gain full visibility into the referral ecosystem — supporting partnership decisions, commission validation, marketing strategy, and performance management.

02 – OBJECTIVES

Business Objectives

Objective	Expected outcome
Scale client acquisition	Grow beyond TEHA's direct marketing reach through partner networks
Measure partner contribution	Attribute applications and successful clients to the correct source
Maintain quality & trust	Distinguish accredited agents from general ambassadors
Reduce manual tracking	Replace informal referral claims with system-recorded attribution
Support commission decisions	Provide data for fair, evidence-based partner rewards

03 – AGENTS

Agent Registration

Agents are individuals or organisations accredited by the appropriate government authority to engage in travel-related services.

Registration requirements

- Complete registration form with personal or organisational details
- Provide contact information and business identifiers as required
- **Upload a valid accreditation or registration certificate**
- Accept TEHA’s partner terms and referral policies

Approval workflow

- Submission enters a pending review queue
- Administrator reviews registration details and uploaded certificate
- Account approved or rejected with reason recorded
- Approved agents receive dashboard access and referral capabilities

Purpose of certificate requirement: To distinguish accredited travel agents from general referral partners and protect TEHA’s brand and compliance standards.

04 – AMBASSADORS

Ambassador Registration

Ambassadors are individuals who wish to promote TEHA and refer potential clients but may not hold formal travel-agent accreditation.

Registration requirements

- Similar registration flow to agents (personal details, contact information)
- **No accreditation certificate required**
- Accept partner terms and referral policies

Approval workflow

- Registration submitted for administrative review
- Approved ambassadors receive dashboard access
- Can generate and share referral links immediately after approval

	Agent	Ambassador
Accreditation certificate	Required	Not required

	Agent	Ambassador
Referral links	Yes	Yes
Performance dashboard	Yes	Yes
Typical profile	Licensed travel agent / agency	Individual promoter, influencer, community leader

05 – REFERRAL SYSTEM

Referral Links & Attribution

Unique referral links

Each approved agent and ambassador receives a unique referral identifier embedded in shareable links, enabling TEHA to track:

- Visitors arriving via the partner's link
- Enquiries and applications originating from that referral
- Conversion through to successful client outcomes

Attribution rules (recommended)

- **First-touch attribution** within an agreed window (e.g. 90 days)
- Referral recorded when a visitor first arrives via a valid partner link
- Attribution persists through application submission and processing
- Admin override available for disputed cases, with audit logging

Promotion channels

Partners may share links through:

- Social media campaigns
- WhatsApp and messaging groups
- Professional networks and events
- Email and community outreach

06 – PARTNER DASHBOARDS

Agent & Ambassador Dashboards

Dedicated partner portals providing:

REFERRAL TOOLS

- Generate / copy unique referral link
- Share-ready referral messaging
- QR code (optional phase)

PERFORMANCE METRICS

- Link clicks / visits
- Enquiries generated
- Applications submitted
- Successful outcomes (where applicable)

ACCOUNT MANAGEMENT

- View registration status
- Update contact details
- Re-upload certificate (agents)

REPORTING

- Date-range performance summary
- Client/application list attributed to partner
- Export summary (optional phase)

07 – ADMIN DASHBOARD

Administrative Dashboard

TEHA administrators will have full visibility and control over the referral ecosystem:

Capability	Description
Agent management	View all registered agents, review details, approve/reject/suspend accounts
Certificate review	Preview and verify uploaded accreditation documents
Ambassador management	View, approve, and manage ambassador accounts
Referral activity	Monitor link usage, visits, and conversion funnel by partner
Application attribution	See which agent/ambassador sourced each application
Performance rankings	Identify top-performing partners for rewards and partnerships
Reporting	Export referral performance data for business decisions

08 – PLATFORM INTEGRATION

Integration with Existing TEHA Platform

The referral system will build on infrastructure already in place:

- **Application workflow** — referred clients enter existing work-abroad application flows with attribution recorded at entry
- **Contact & enquiry forms** — study and travel leads capture referral source
- **Reference numbers** — applications retain traceable identifiers linked to partners
- **Analytics engine** — referral events feed into existing reporting patterns
- **Admin RBAC** — referral management permissions integrated with current role system
- **Audit logging** — partner approvals, document access, and attribution overrides logged
- **Secure document storage** — agent certificates stored using existing upload infrastructure
- **Email notifications** — registration confirmations, approvals, and status updates via Resend

09 – SECURITY

Data, Security & Compliance

- Partner accounts protected by secure authentication (separate from admin and applicant flows)
- Accreditation certificates stored privately with admin-only access
- Personal data handled in line with TEHA’s existing privacy policy
- Referral attribution data retained for agreed reporting and commission periods
- Rate limiting and validation on registration and login forms
- Audit trail for approval decisions and attribution overrides

10 – PHASES

Recommended Implementation Phases

Phase	Deliverables
Phase 1 – Foundation	Agent & ambassador registration, certificate upload, admin approval workflow
Phase 2 – Referral engine	Unique links, visit tracking, attribution on applications and enquiries
Phase 3 – Dashboards	Partner performance dashboards and admin referral reporting
Phase 4 – Optimisation	QR codes, export reports, commission reconciliation tools (as agreed)

11 – OUTCOMES

Success Metrics & Business Outcomes

METRICS TO TRACK

- Active agents and ambassadors
- Referral link clicks and conversion rate
- Applications per partner
- Successful clients per partner
- Cost per acquired client via referrals

BUSINESS OUTCOMES

- Scalable word-of-mouth growth
- Geographic market expansion
- Data-driven partner management
- Fair, auditable commission basis
- Stronger TEHA partner ecosystem

This specification is confidential and intended for The Experts Hub Africa management and authorised stakeholders. Implementation details may be refined during development while preserving the business objectives described herein.
